Cloud Computing & Big Data

Projects & Experience

InVault — College Station, TX   January 2018 — March 2018

Designed a high fidelity prototype of a mobile application that lets users store and manage their personal belongings in case of a future natural disaster. InVault is aimed towards adult home owners who need a way to safe keep their proofs of purchase for insurance claims.

StudyOnBoard — College Station, TX   December 2013 — May 2014

Developed and designed both the desktop and mobile websites for a small startup based in College Station, Texas that offers college students a cloud-based, collaborative environment where students can work together in real-time; a study room based entirely online.

Education is Freedom — Dallas, TX   February 2013 — May 2013

Developed and designed an iPhone application using HTML5 and CSS3 for a local, non-profit organization located in Dallas, Texas that aids students through the college application process; the application was also utilized as the official mobile webpage of the EIF organization.
